Tomato	VT	12-24	.25		S									PT							H			
Night time low with a 50% probability								24°			28°				32°							32°		28° 24°

H=Hardy vegetables grow with daytime temperatures as low as 40°F and may survive a frosty nip  
 SH=Semi-hardy vegetables grow with minimum daytime temperatures of 40°F to 50°F, but are less tolerant of a frosty nip  
 T=Tender vegetables grow with daytime temperature above 55°F, and are intolerant of frost  
 VT=Very tender vegetables grow with daytime temperatures above 60°F (prefer 70°F to 95°F), and are intolerant of frost or cool winds  
 \* harvest dates are general based on days to maturity; dates may change within varying vegetable varieties
